IKL332 glaze in barrier louvre

10mm stainless steel
bar @ approx.
300mm centres

Product description

Designed to cover areas where fall from height is an issue. 10mm stainless steel rods are fitted to act as barrier protection. Fitted at 100mm centres, usually to a maximum of 1100mm from finished floor level, complies with all aspects of Part K of the building regulations. Other spacing up to a maximum of 300mm can be provided at the discretion of the client.

Blade spacing can vary to suit individual project requirements

Blade angle 60 degree.

Visual and physical free areas depend on blade spacing

Frame depth 36.2mm

Rods tested in-situ within louvre frame to 0.5Kn point load, 1.5Kn line load

Tested to BS6180:2011

Bre Test report P103323-1000

Test sample size 1000 x 2000

Options

Standard RAL or BS colours. Anodizing to special order.
