## Sand louvre

### Product description

Custom made industrial grade sand louvre designed to prevent the ingress of sand and large size particles

Standard RAL or BS colours. Anodizing to special order.

Frame depth 100mm. Maximum free area 33%

Designed to be fitted into apertures, bolted side by side or glazed into fenestration

May have an angle, channel or flat faced outerframe to suit various fixing options.

Units can be made any practical size taking into account overall weight and on-site handling conditions
